EDUCATION

COMSATS University Islamabad

BS Computer Science, 7th Semester

Feb. 2022 - Present

Islamabad, Pakistan

- CGPA 3.24/4
- Web Technologies, Advanced Web, DevOps, DSA, Design & Analysis Algorithms, Operating Systems, OOP, Database Management, Software Engineering, AI, ML, Parallel and Distributed Computing, Computer Networks, Numerical Computing

Beaconhouse Margalla Islamabad

A Levels

Sept. 2019 - Nov. 2021

Islamabad, Pakistan

- Chemistry (A*), Physics (A), Mathematics (B)

EXPERIENCE

Webrange Solutions

Intern

Sept. 2024 - Present

Islamabad, Pakistan

- Currently working on building a fully functional website using the MERN stack, integrating AI features as part of a collaborative project with Webrange Solutions.

PROJECTS

Project Management Platform

- Created a Project Management Platform using MERN stack in a group of 3 with role-based user access and real time task management and chat support. My role was to create the frontend of the application using React. Used lucide-react and shadcn for enhancing the UI of our system. Integrated the frontend with backend using Axios.

MERN Project Deployment Using AWS

- Deployed a full-stack MERN application using AWS EC2 and Elastic Beanstalk, with a Linux-based EC2 instance as the hosting environment.

MealPlanner

- Created a MealPlanner application which helps users track their meals using MERN stack. Integrated shadcn and lucide-react for the UI. Used Axios to implement and connect the Backend for my application. Implemented CRUD operations and used Express for Backend.

Food Ordering App with Recommendations

- Created a Food Ordering Mobile App using Flutter in a group project. Built a Recommendation System using Cosine Similarity to find similar food items based on their different features.

Task Noting Application

- Implemented a simple task management application using React, allowing users to add, edit, and delete tasks on the same page. Utilized the useState hook to manage UI updates in response to user interactions.

Movie Recommendation System

- Used NLTK and Cosine Similarity to process the data and find similarity for each movie and suggest movies.

CERTIFICATIONS

Frontend Developer Professional Certificate (Meta).

Python for AI (IBM).

SKILLS

ReactJS, Node.js, Express.js, Java, Tailwind CSS, PyTorch, Python, AWS Deployment, Git, Linux, Docker, Jenkins, Selenium, JavaScript, Kubernetes

INTERESTS

Football, Cricket, Crypto, Books, Technology
